

## **Company Profile**

## HISTORY

**Evolution Tech Services** was established in 2011 responding to a fast technological evolution that has imposed a new way of communicating and doing business .

Evolution Tech Services provides ICT services aiming to achieve maximum efficiency in business management.

Evolution Tech Services now operates in Europe providing consulting and training services considered an important reference for many of its customers , achieved their goals with our assistance.

Experience, expertise , flexibility and dynamism are the strengths that have contributed to the consolidation of our company as a qualified partner of companies and organizations of exceptional importance. .

## MISSION

Evolution Tech Services combines culture, competence and proactivity with new technologies and experienced professionals aiming the development of innovative, flexible and efficient solutions .

The progressive evolution towards the globalization of markets , the emergence of new applications, the advent and power of the Net, the radical transformation of telecommunications, caused the development of increasingly complex architectures . Technological progress requires specific knowledge and skills and high professional standards.

Evolution Tech Services responds to this challenge with flexibility and a management team able to offer solutions and effective services to partner companies.
